

|                      |                                                |
|----------------------|------------------------------------------------|
| Product Name         | Lightning Event Counter                        |
| Product Code         | SLSC-10                                        |
| Application          | Lightning Protection                           |
| Applicable Standards | NFC 17 102 / UNE 21186 / IEC 62561 / IEC 62305 |

| Product Information      |                                                                 |
|--------------------------|-----------------------------------------------------------------|
| Model                    | SLSC-10                                                         |
| Overall Dim.             | 11.3x7.0x4.8 cm                                                 |
| Ingress Protection       | IP67                                                            |
| $\Delta T$ (Response)    | 100 $\mu$ s                                                     |
| Class Acc. To IEC 62305  | H                                                               |
| Material                 | <a href="#">Polypropylene</a> & <a href="#">Stainless Steel</a> |
| Recommended Installation | 1.5 meter Above Ground                                          |
| Power Supply             | Not Required (all Mechanical)                                   |
